

ŽIVOTOPIS predavača:

Prof. Ruben LOSTADO

Kratki životopis

Rubén Lostado Lorza is a PhD. Industrial Engineering. He is working as lecturer in the Mechanical Engineering Department at the University of La Rioja, Spain since 2007. Previously he worked as a Mechanical Engineer using the Finite Element Method in the R & D Department of a couple of companies. One of its lines of research is the modeling and optimization of mechanical products or devices (Welded Joints and Bearings) with nonlinear behavior and industrial processes by combining the FEM and machine learning techniques.
