The Congress and the Venue

ICCSM is a triennial international congress organized by the Croatian Society of Mechanics since 1994. It aims to create an environment for the exchange of new ideas and achievements in mechanics. The range of topics is very wide and covers all areas of theoretical, computational and experimental solid and fluid mechanics.

11th ICCSM will take place from September 30 to October 3, 2025 at the Hotel Olympia in Vodice. Vodice is a small town in the center of the east coast of the Adriatic Sea and a popular tourist destination known for its beautiful beaches. The nearby town of Šibenik is the administrative and economic center of the region. The town is located in the middle of a beautiful natural and historical environment. The bay in which Šibenik is located is the mouth of the river Krka, a well-known karst river. Šibenik has a charming old town center and two UNESCO-protected monuments. The first is the Cathedral of St. James, the other is the Fortress of St. Nicholas, one of the city's four fortresses. Šibenik will be visited during the congress excursion. A post-congress boat trip to NP Krka is also planned, see the website for details.
